

Ebola and West Africa: THE FACTS

- The distance from the Ebola epicenter to the safari parks of East and Southern Africa is the same as New York City to Anchorage, Alaska.
- South Africa and Kenya stopped all flights to and from affected West African countries.
- No Ebola cases have occurred in East or Southern Africa.
- Ebola is not transmitted in the air like flu; direct physical contact with bodily fluids is the only method of transmission.
- Paris, Madrid and London are closer to the Ebola epicenter than Nairobi or Cape Town.

Cases of Ebola Outside of West Africa as of Oct. 8, 2014
